

FUNCTIONALITIES

About Alma3D Platform:

- Access throughout the enterprise with WEB platform.
- Can be installed on virtually any commercial PC or laptop.
- Customizing of workflow through hanging protocols.
- Personalised configuration are kept in user profiles.
- WEB or local integration with HIS/RIS/PACS Systems.
- Intuitive graphic user interface.
- Concurrent licensing for enterprise solutions.

About Alma Vascular:

- Analysis of tiny arteries or entire vascular system.
- Specific analysis of the aorta and coronary arteries.
- Vessel tracking to show the lumen area and calcifications along the vessel.
- Complete MPR functions (including curved MPR), with MiP, MiniP, advanced data segmentation and 3D Volume Rendering (VR).
- Segmentation tools designed to effectively select and analyse area of interest.
- Capturing of key images of essential stenosis measurements.
- Paraxial view perpendicular to the vessel centerline.
